Protects up to 500sq ft/ 46m²

Dimensions: H 565mm x W 385mm x D 285mm

Weight: 17lbs/8kg

120V 60Hz or 230V 50Hz

Blower Speed	Energy Usage (Watts)	Air Flow		dBA
Low	9	22 cfm	10 l/s	39
Med	15	49 cfm	23 l/s	46
High	25	79 cfm	37 l/s	53
Turbo	61	150 cfm	70 l/s	61

Cubic feet per minute (CFM)

OKTOair powered by HealthWay

Exceeding the EN 1822 European HEPA Standard

FEATURES

- Particle efficiency - 99.99% @ 0.007 micron making it the most efficient available.
 - 6-stage VOC adsorption filter for heavy removal of harmful gases and odours.
 - Patented DFS technology efficiently removes up to 99% of airborne mould, bacteria and viruses passing through the system.
 - Each machine is independently tested and certified to guarantee better than HEPA efficiency
-
- Substantial reduction in airborne microorganisms, chemicals, offensive gases odours and smoke.
 - Less dust and dander, pollen, dust mite waste, bacteria, mould, fungi and virus protection
 - Compact, ultra slim design
 - Easy to maintain
 - A clean and fresh smelling environment
 - The revolutionary DFS technology reduces bioburden and inhibits microorganism growth passing into the system through Microbiostasis condition.
