

# R-32 Mini Chillers

Air cooled mini inverter chiller and heat pump

Why choose

# Daikin R-32 models?

Daikin is continuously leading in chiller technology, striving for innovation with the launch of the new generation of air cooled chillers and heat pumps with R-32 refrigerant, expanding more and more its Bluevolution range.

With the highest efficiency at both partial and full load, installers and building owners can give end users better results for all year round comfort – with lower noise levels and higher energy efficiency than ever before.

Thousands of sites around the world have relied on Daikin high efficiency products to reduce their running costs without compromising on climate comfort or performance.

With the new R-32 air cooled mini inverter chiller and heat pump, Daikin has once again improved the units performances, increasing the the energy efficiency and at the same time reducing our environmental footprint.

## R-32 refrigerant

### Environmental Impact

R-32 has zero ozone depletion potential (ODP=0)

- > Lower Global Warming Potential (GWP): only a third of R-410A (R-410A GWP: 2.088; R-32 GWP: 675)
- > Lower refrigerant charge compared to the R-410A units
- > Reduced environmental impact: reduction of CO<sub>2</sub> equivalent up to 75%

### Safety

- > R-32 is a single component refrigerant: easy to charge, to handle and recycle
- > R-32 has a low flammability therefore it can be safely used in many applications
- > R-32 has low toxicity

### Energy Efficiency

R-32 products have higher energy efficiency: up to A+++

### Cost Effectiveness

- > Pricing stability of R-32 as lower GWP refrigerant is more likely to expect than for other F-gases with higher GWP

#### What is ODP?

The ODP or Ozone Depletion Potential is the potential for a single molecule of the refrigerant to destroy the ozone layer. The smaller the ODP value, the better the refrigerant is for the ozone layer and therefore the environment.

over a period of 100 years. The lower the GWP value, the less harmful a refrigerant is for the environment.

#### What is GWP?

Global Warming Potential (GWP) expresses the potential impact that a particular refrigerant would have on global warming if it were released into the atmosphere. It is a relative value which compares the impact of 1kg of refrigerant to 1kg of CO<sub>2</sub>

#### What is CO<sub>2</sub> equivalent?

CO<sub>2</sub> equivalent is the impact on the Global Warming Potential compared to CO<sub>2</sub>.  
CO<sub>2</sub> equivalent = GWP x kg

(1) In reference to EWA(Y)-D

# Air cooled mini inverter chiller

- › Inverter controlled swing compressor with refrigerant R-32
- › R-32 refrigerant: reduced environmental impact and 30% less refrigerant charge needed
- › Application range **cooling** air side + 10°C to + 43°C
- › Application range **cooling** water side + 5°C to + 22°C
- › Compact design with built-in hydraulic kit: no buffer tank required, standard inverter driven pump, expansion vessel, main flow sensor and switch included
- › Easy installation and maintenance
- › Separate MMI-2 controller for indoor installation

(1)Cooling: EW 12°C; LW 7°C; ambient conditions: 35°CDB | (2)Cooling: EW 23°C; LW 18°C; ambient conditions: 35°CDB | (3)Condition: Ta DB/WB 7°C/6°C - LWC 35°C (DT = 5°C) | (4)Condition: Ta DB/WB 7°C/6°C - LWC 45°C (Dt=5°C) | (5) EWYA-DV3P-H- has water piping heater tape (OP10) as standard

# Air cooled mini inverter heat pump

- › Inverter controlled swing compressor with refrigerant R-32
- › R-32 refrigerant: reduced environmental impact and 30% less refrigerant charge needed
- › Application range **cooling** air side + 10°C to + 43°C
- › Application range **cooling** water side + 5°C to + 22°C
- › Application range **heating** air side -25°C to +25°C
- › Application range **heating** water side +9°C to +60°C
- › Compact design with built-in hydraulic kit: no buffer tank required, standard inverter driven pump, expansion vessel, main flow sensor and switch included
- › Easy installation and maintenance
- › Separate MMI-2 controller for indoor installation
- › Water piping heater tape (OP10) as standard for a better insulation of the hydraulic<sup>(5)</sup>

# R-32 Mini Chillers

## NEW Air cooled mini inverter chiller and heat pump with low GWP R-32

A very compact air cooled unit, available both in cooling only (EWAA-DA) and heat pump configurations (EWYA-DA). Thanks to its extended range from 11-16 kW it's a green and efficient solution for all those residential applications requiring compact units for comfort cooling and heating.

- › Environmental friendly R-32 refrigerant
- › Control possible via app or voice command
- › Compact - reduced foot print
- › Seasonal efficiency up to A+++
- › Maximum leaving water temperature up to 60°C
- › Easy installation and maintenance
